# **PROJECTS**

Sorting Algorithms Visualizer <a href="https://talalzeini.github.io/sorting-visualizer/">https://talalzeini.github.io/sorting-visualizer/</a>

 Created a sorting algorithms visualizer with p5.js that helps you understand how some of the most famous sorting algorithms work such as bubble sort and selection sort.

C++ Sorting Algorithms <a href="https://github.com/talalzeini/sorting-cpp/">https://github.com/talalzeini/sorting-cpp/</a>

• Used C++ to develop a program that shows how sorting algorithms differ using only  ${\bf C++}$ .

Portfolio Website https://talalzeini.com

• Showcasing personal software projects, built using HTML, CSS, JavaScript.

Portfolio Generator <a href="https://talalzeini.github.io/website-generator/">https://talalzeini.github.io/website-generator/</a>

- Web application you can use to create a similar portfolio website of mine.
- The development of this website generator is still in progress.

Quiz Generator <a href="https://talalzeini.github.io/personal-quiz/">https://talalzeini.github.io/personal-quiz/</a>

• Web application that helps you practice for any kind of test, by taking a quiz you get to create.

Other Side Projects <a href="https://github.com/talalzeini/">https://github.com/talalzeini/</a>

- Real estate website, a restaurant website, a soccer betting website a tip and scientific calculator. Series of Games.
  - Developed and designed many games using Unity Engine and C# available to see on my portfolio.

## **SKILLS**

- Proficient: HTML, CSS, C++, Unity Engine, Mixamo, Visual Studio, Git.
- Experienced: Javascript, C#.
- Familiar: Swift, Adobe XD, Firebase, node.js, p5.js.
